

At Last

Several months ago we placed a large order with a New York maker for a line of Blue Serge Suits. Yesterday we unpacked the shipment and read a long letter from the maker about the scarcity of dye stuffs, and that they come from Germany, and on account of the war the stock of dye had about run out, but they had enough of it to dye the cloth for these suits, and maybe after a while we will all be wearing pink suits or some other color. Why don't some one get busy and find out how to dye in this country, and if you want to know how to open a credit account come in and see the man behind the office door at

LOCAL TURTLES ARE SHIPPED TO 'FRISCO

Turtle soup made from Hawaiian Islands turtles is being served in San Francisco now, 25 live turtles caught on Oahu and the other islands having been shipped to the coast by a haul of local Chinese, the shipment leaving on the Wilhelmina's last home-ward voyage.

The animals were consigned to a San Francisco restaurant, and regular shipments will probably be made if the first consignment results in a suitable demand. The price obtained by the shippers is said to have been approximately \$50 each.

Seventy-five per cent of all lightening losses are in the country.

La Paloma Now Fishing Boat

Joseph Miller, at left, and W. E. Kerr, at right, who will have charge of the yacht La Paloma, which was purchased this week by a haul of local sportsmen. The La Paloma, which can accommodate as many as 100 people on each trip, will be used for renting to pleasure parties and fishing parties. Miller will act as captain of the craft, which today is out for its first trip under the new owners. Aboard are a large number of mainlanders who are out for a shark fishing expedition. The shark shown in the picture, caught from La Paloma, was 10 feet 2 inches in length.

MELON-CUTTING IN U. S. STEEL

Stock market followers in Hawaii, who are watching United States Steel will be interested in the following comment by Henry Clews, the New York banker:

"Under the leadership of United States Steel the entire market became reactionary during the greater portion of the week (January 29). This representative corporation of the steel

trade had risen from pauper to prince and more than doubled in price in exactly 12 short months. Much stock had been accumulated in anticipation of a resumption of dividends. When this occurred heavy liquidation naturally followed. A year ago the company passed its dividends, earnings being the lowest on record. This week dividends were resumed at the 5 per cent rate, earnings having touched the highest point in the history of the company. The quarter's net earnings amounted to \$51,200,000, or \$5,700,000 in excess of any previous quarter, and compare with \$10,900,000 a year ago. The company's earnings thus reflected the unexampled prosperity of this great industry, a prosperity the end of which is by no means in sight, since the whole trade is still pressed with orders at highly profitable prices.

"Actual announcement of the dividend, though a most encouraging fact, was promptly followed by general profit taking and the stock quickly fell from 85 1/2 to 82 1/2. The heavy transactions in these shares affected the whole market and started general liquidation, which was accelerated by the munition shares because of their lessened popularity, and by the railroad shares because of impending labor difficulties."

GETS HALEIWA GOLF GROUNDS READY FOR CARNAVAL TOURISTS

Clifford Kimball, manager of the Haleiwa hotel, has sent word to the Hawaii Promotion Committee that the Haleiwa golf links have recently been put into shape and are now ready for use.

The links at Haleiwa are among the pioneer courses in the islands. Mr. Kimball has had them worked over recently so that tourists who spend part of their stay in the country may not have to forego the pleasure of the popular game.

That the Country Club grounds are proving popular with the tourist population also is evident from the fact that there were 45 players on the links at one time a few days ago.

The Siamese have a superstitious dislike of odd numbers and they studiously strive to have in their houses an even number of windows, doors, rooms and cupboards.

There was an increase in 1913 of the number of insane people in Ireland from 24,839 to 25,009. These figures do not include wanderers at large or residents in private dwellings.

ANOTHER GOOD NIGHT FOR SLEEPING; COOL LIKELY TO CONTINUE

Last night was another good one for sleeping. The minimum temperature recorded by the thermometers of the U. S. weather bureau's local office in the Young Hotel building was 62.8 degrees against a minimum of 63.2 degrees Tuesday night.

Temperature at 8 o'clock this morning was 67 degrees, Meteorologist A. M. Hamrick reported. This was one degree cooler than at the same hour yesterday. The relative humidity at 8 this morning was 73 per cent. Indications are that the present delightful brand of weather will continue.

LIEUT. JOHNSON'S NICE PERFUMED SOAP IN PINK BOX TEMPTS FILIPINO

Possibly in preparation for an elaborate toilet prior to the opening of the Carnival, Felix Villasing, a Filipino, who has been working at Schofield Barracks, is charged by the police with having stolen from the home of Lieut. Alexander L. P. Johnson.

4th Cavalry, the following articles:

One cake of perfumed soap, in a pink soap box; one bath towel; one hand-made table cover, one bath sponge, and other small articles.

Even the police are unable to hazard a guess as to what Villasing intended to do with one gong-rap and one bath mat, also in the collection he carried away.

Villasing took the articles while working about the house, it is said, and is charged with larceny only. He will be tried February 17, in the police court.

POLICY OF PEACE HURTS U.S. TRADE, SAYS VANDERLIP

Government Now More Concerned With Advantages at Home Than Justice Abroad

Criticism of American shipping laws, the tariff, of laws relating to railroads and "big business," and of the proposal for a government-owned merchant fleet was voiced at New Orleans at the Third National Foreign Trade Council, says a recent despatch to the New York World.

Speakers included Fairfax Harrison, President of the Southern Railway; Frank A. Vanderlip, president of the National City Bank, New York, and Joseph E. Davies, chairman of the Federal Trade Commission.

Peace Policy a Handicap.

Mr. Vanderlip declared the United States did not need government aid to succeed in world trade so much as relief from governmental handicaps.

He said: "We still have handicaps in the extension of the foreign trade of a government so devoted to peace that justice to its citizens in foreign countries weighs but scantily in the balance against the advantages of peace for its people at home."

"If this nation is to be placed in most efficient form to meet international competition," he continued, "let us sensibly remove a lot of existing foolish legislation that is uneconomic in its results, unnecessarily restrictive in its operation and has been helpful only to politicians of all parties as a basis for demagogic appeals for votes."

"There is an effort under way now to give government aid in the attempt to enact a \$50,000,000 shipping bill. Several times fifty millions of private capital could be commanded if it could have permanent assurance it could enter the world's field of shipping not handicapped by governmental regulations from which the capital of other countries is free."

For many years a superphosphate company at Stockholm has been experimenting with new explosives, and now seems to have found one warranting extensive manufacture. It is very powerful, and one of the principal ingredients is perchloride of ammonia prepared in some special way, "Kausolite," as it is called, has great explosive power and seems especially adapted to shells.

The Italian government uses American machinery to manufacture shoes for its soldiers.
